

How do I check if HP Web Services are enabled on my non-touchscreen printer?

1 Initial Printer Setup:

- Configure your printer according to the instructions on the packaging

- Ensure that your printer and mobile device are connected to the same wireless network

Step 1
Find out the name of the network your printer is on

Step 2
Connect your mobile device to the same network as your printer

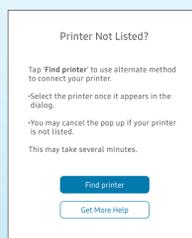

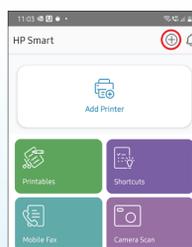

2 Install HP Smart App:

- Download the HP Smart App on your mobile device, via the Apple App Store or Google Play Store

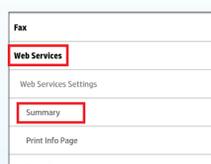

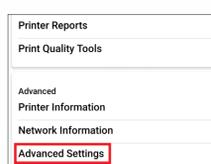

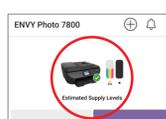

3 Connect Your Printer

- Open the HP Smart App and tap on  then select your printer from the list displayed
- If your printer is not displayed, tap on **Add Printer** or **Find Printer** to manually connect your printer

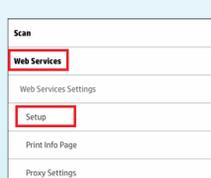

4 Check If HP Web Services Are Enabled:

- Once your printer is added, tap on your **printer image** at the top of the screen
- Under the Advanced section, select **Advanced Settings** and you will be directed to the **Embedded Web Server** webpage
- Tap on **Web Services**, followed by **Web Services Settings**. If the Web Services are already enabled, you will see a **Summary** selection

Not yet enabled:

- If Web Services are not enabled **Setup** will appear as one of the selection. Tap on **Setup** and follow the screen instructions to enable your Web Services
- If a PIN is required during your setup, please follow step 5

5 Check If HP Web Services Are Enabled (Only if PIN is required)

- You can either find the PIN on a label inside the printer cartridge access area or print it by tapping on **Print PIN**
- Enter the PIN and tap on **Submit**. You will be directed to a page with Terms of Use
- Accept the Terms of Use and tap on **Next**
- After your Web Services are enabled, you will be notified that it has been successfully set up. Tap **OK** to complete the process
